
	BQA NCQF QUALIFICATION TEMPLATE	Document No.	DNCQF.QIDD.GD02
		Issue No.	01
		Effective Date	04/02/2020

SECTION A: QUALIFICATION DETAILS														
QUALIFICATION DEVELOPER (S)				University of Botswana										
TITLE		Master of Science (Chemistry)								NCQF LEVEL		9		
FIELD		Natural, Mathematical and Life Sciences		SUB-FIELD		Chemistry				CREDIT VALUE		240		
New Qualification						<input checked="" type="checkbox"/>		Review of Existing Qualification						
SUB-FRAMEWORK			General Education		<input type="checkbox"/>		TVET		<input type="checkbox"/>		Higher Education		<input checked="" type="checkbox"/>	
QUALIFICATION TYPE		Certificate		I	II	III	IV	V	Diploma		Bachelor			
		Bachelor Honours			Post Graduate Certificate					Post Graduate Diploma				
		Masters						<input checked="" type="checkbox"/>		Doctorate/ PhD				
RATIONALE AND PURPOSE OF THE QUALIFICATION														
RATIONALE: <p>Chemistry's broad scope offers exciting employment opportunities in rapidly growing fields, such as biochemistry, biotechnology, forensic science, materials science, polymers, pharmaceutical/medicinal chemistry, chemical education research, and environmental science. Master of Science (Chemistry) graduates are equipped with skills</p>														

	BQA NCQF QUALIFICATION TEMPLATE	Document No.	DNCQF.QIDD.GD02
		Issue No.	01
		Effective Date	04/02/2020

to enter any of these fields since chemistry is the central science with connections to biology, mathematics, physics, medicine, and environmental sciences.

Botswana's economy drivers include mining, agriculture, and tourism, which require highly qualified graduates who will ascertain quality in the processes and commodities derived from these drivers. The above mentioned are scarce skills in Botswana hence the need to produce more skilled people in this particular field of science. Jobs in these fields are mostly filled by expatriates in Botswana.

The qualification will help Botswana to have chemical experts such as geochemists, water chemists, material scientists, food scientists, quality assurance scientists, and medical laboratory scientists as outlined in the HRDC document for the most needed skills in Botswana, thus, helping Botswana to achieve the objectives of Pillar 1 (Sustainable Economic Development) of the vision 2036 specifically the development of knowledge-based economy, strategy priority 5: strengthening skill development of the Botswana Education and Training Sector, Strategic Plan (ETSSP-2015-2020 and achieve higher transition rates from secondary to tertiary education as highlighted in article 5.9 of the National Development Plan 11 2017-2023).

PURPOSE:

The purpose of the qualification is to produce graduate who have most advanced knowledge, skills, and competences to:

- Produce highly skilled labour which will participate in research and development centers.
- Undertake specialized research and analytical techniques necessary for professional chemists.
- Apply new skills and techniques to identify and solve problems in a range of professional contexts.
- Implement a strategy for dissemination of research findings and defend the research work and outputs before a diverse audience.
- Exercise high level of initiative and scholarly integrity in a wide range of context.

ENTRY REQUIREMENTS (including access and inclusion)

Minimum entry requirement:

- Bachelor of Science Degree in Chemistry (NCQF level 7) or equivalent.

	BQA NCQF QUALIFICATION TEMPLATE	Document No.	DNCQF.QIDD.GD02
		Issue No.	01
		Effective Date	04/02/2020

- There will be access through Recognition of Prior Learning (RPL) and Credit Accumulation and Transfer (CAT) in accordance with the RPL and CAT National Policies.

	BQA NCQF QUALIFICATION TEMPLATE	Document No.	DNCQF.QIDD.GD02
		Issue No.	01
		Effective Date	04/02/2020

SECTION B QUALIFICATION SPECIFICATION	
GRADUATE PROFILE (LEARNING OUTCOMES)	ASSESSMENT CRITERIA
LO 1. Demonstrate advanced knowledge at the frontier of chemistry or cross-disciplinary fields capable of contributing towards development of professional practice through research or reviewing existing knowledge.	1.1 Conduct original and scholarly research of international standard to solve problems. 1.2 Formulate a research question. 1.3 Conduct comprehensive literature review and synthesize knowledge. 1.4 Design an appropriate research methodology for the problem at hand.
LO 2. Demonstrate advanced skills and techniques including critical analysis, evaluation and synthesis of new and complex ideas to develop new knowledge.	2.1 Solve a chemistry problem through research. 2.2 Identify the right kind of data required to solve a chemistry problem. 2.3 Collect, analyse data and interpret findings using appropriate statistical analytical tools and techniques. 2.4 Produce a report using scientific academic writing.
LO 3. Implement a strategy for dissemination of research findings and defend the research work and outputs before a diverse audience	3.1 Draft reports using scientific academic writing. 3.2 Present research findings at national, or regional scientific meetings. 3.3 Compose an original research MSc dissertation. 3.4 Publish manuscripts in international-peer reviewed journals with a known impact factor.

	BQA NCQF QUALIFICATION TEMPLATE	Document No.	DNCQF.QIDD.GD02
		Issue No.	01
		Effective Date	04/02/2020

<p>LO 4. Demonstrates advanced leadership skills, mastery of professional practice and management with some responsibility and accountability of resources.</p>	<p>4.1 Plan and execute a research project with minimal supervision</p> <p>4.2 Design steps towards solving the problem</p> <p>4.3 Adhere to standard operating systems (SOPS) in a chemical environment.</p>	
<p>LO 5. Employ scholarly and professional integrity.</p>	<p>5.1 Apply advanced research methodologies to contribute new knowledge in chemistry.</p> <p>5.2 Adhere to ethical research and academic integrity.</p>	

	BQA NCQF QUALIFICATION TEMPLATE	Document No.	DNCQF.QIDD.GD02
		Issue No.	01
		Effective Date	04/02/2020

<p>LO 6. Demonstrate strategic leadership, proficiency in professional practice and associated systems design in research.</p>	<p>6.1 Plan and execute a research project independently. 6.2 Analyse a scientific problem. 6.3 Design steps towards solving a problem. 6.4 Analyse and evaluate of existing professional practice. 6.5 Place issues and ideas in perspective in specialized research.</p>
<p>LO 7. Exercise high level of initiative and scholarly integrity in a wide range of context</p>	<p>7.1 Write reports using scientific academic writing. 7.2 Adhere to ethical research and academic integrity. 7.3 Apply advanced research methodologies to contribute significant knowledge in Chemistry</p>

		Issue No.	01
		Effective Date	04/02/2020

SECTION C		QUALIFICATION STRUCTURE			
COMPONENT	TITLE	Credits Per Relevant NCQF Level			Total <i>(Per Subject/ Course/ Module/ Units)</i>
		Level [9]			
FUNDAMENTAL COMPONENT <i>Subjects/ Courses/ Modules/Units</i>	Separation Science and Spectrometry				15
	Advanced Inorganic Chemistry				15
	Advanced Physical Chemistry				15
	Advanced Organic Chemistry				15
CORE COMPONENT <i>Subjects/Courses/ Modules/Units</i>	Supervised research				120
	Analytical Chemistry				
	Electroanalytical Chemistry				15

 BQA NCQF QUALIFICATION TEMPLATE	Document No.	DNCQF.QIDD.GD02
	Issue No.	01
	Effective Date	04/02/2020

ELECTIVE/ OPTIONAL COMPONENT <i>Subjects/Courses/ Modules/Units</i>	Process instrumentation and sample handling				15
	Chemometrics				15
	Applications of Analytical Chemistry				15
	Organic chemistry				
	Spectroscopic Methods in Organic Chemistry				15
	Methods and Design of Organic Synthesis				15
	Advanced Laboratory Synthesis				15
	Introduction to the Chemistry and Biosynthesis of Natural Products				15
	Inorganic chemistry				
	Main Group Chemistry				15
	Physical Methods in Inorganic Chemistry				15
	Kinetics and Mechanisms of Reactions in Transition				15

	BQA NCQF QUALIFICATION TEMPLATE	Document No.	DNCQF.QIDD.GD02
		Issue No.	01
		Effective Date	04/02/2020

	Metal, Coordination and Organometallic Chemistry				
	Chemistry of the Solid State, Metals and Semiconductors				15
	Organometallic Chemistry in Homogeneous Catalysis and Synthesis				15
	Physical Chemistry				
	Advanced Physical Chemistry				15
	Quantum Mechanics and Spectroscopy				15
	Interfacial Phenomena				15
	Polymer Chemistry				15
	Advanced Chemical Kinetics				15

(Note: Please use Arial 11 font for completing the template)

	BQA NCQF QUALIFICATION TEMPLATE	Document No.	DNCQF.QIDD.GD02
		Issue No.	01
		Effective Date	04/02/2020

SUMMARY OF CREDIT DISTRIBUTION FOR EACH COMPONENT PER NCQF LEVEL	
TOTAL CREDITS PER NCQF LEVEL	
NCQF Level	Credit Value
9	240
TOTAL CREDITS	240
Rules of Combination: (Please Indicate combinations for the different constituent components of the qualification)	
<p>A Candidate must complete a total of 240 credits.</p> <p>The candidate shall register for 60 credits of the fundamental courses, 120 credits of the core courses (which is a research project in the chosen area of specialisation).</p> <p>The candidate shall register for at least 60 credits chosen from one of the four elective/optional courses in the specialization area of choice.</p>	

	BQA NCQF QUALIFICATION TEMPLATE	Document No.	DNCQF.QIDD.GD02
		Issue No.	01
		Effective Date	04/02/2020

ASSESSMENT ARRANGEMENTS

Formative assessment (tests, concept papers, presentations, and assignments) shall contribute 50% and summative assessment comprising a written dissertation/report and an oral defence will be used to assess the candidate's research. This shall contribute 50 %.

MODERATION ARRANGEMENTS

There shall be internal and external moderation arrangements done by BQA registered and accredited moderators.

RECOGNITION OF PRIOR LEARNING

This will be done in line with the National Recognition of Prior Learning (RPL) policy.

CREDIT ACCUMULATION AND TRANSFER

Transfer of credits from another recognized University or equivalent Institution of higher education may be considered on production of satisfactory documentation and references. No more than one-third of the total number of credits required for the programme can be credited from study at another university.

PROGRESSION PATHWAYS (LEARNING AND EMPLOYMENT)

Horizontal Articulation:

- Master of Science (Medicinal Chemistry)
- Master of Science (Industrial Chemistry)
- Master of Science (Forensic Science)
- Master of Science (Environmental Science)
- Master of Science (Material Science)

Vertical Articulation:

- Doctor of Philosophy (Chemistry)
- Doctor of Philosophy (Medicinal Chemistry)
- Doctor of Philosophy (Industrial Chemistry)
- Doctor of Philosophy (Forensic Science)
- Doctor of Philosophy (Environmental Science)
- Doctor of Philosophy (Material Science)

Employment pathways:

- Senior Secondary School Teacher
- Lecturer in academic institutions
- Research and development chemist in industry
- Chemist in mining industry
- Chemist in food industry
- Chemist in fuel industry
- Environmental quality control professional.
- Chemist in regulatory agencies dealing with environment, drug quality, consumer protection
- Chemist in energy and utilities (power and water)
- Quality control chemist in water treatment and supply
- Consultant for pharmaceutical manufacturers
- Chemist in consumer goods manufacturing
- Consultant in agricultural enterprises
- Chemist in fertilizer manufacturing.
- Consultant in all enterprises dealing with chemicals.
- Consultant in customs departments
- Chemist in bureaus of standards
- Process Chemists

	BQA NCQF QUALIFICATION TEMPLATE	Document No.	DNCQF.QIDD.GD02
		Issue No.	01
		Effective Date	04/02/2020

QUALIFICATION AWARD AND CERTIFICATION

Qualification award:

On successful completion, a candidate will be awarded a Master of Science degree in Chemistry. The candidate should have achieved a minimum of 240 credits according to the rules of combination to be awarded this qualification.

Certification:

The successful candidate will be awarded a Master of Science (Chemistry) and an official transcript.

REGIONAL AND INTERNATIONAL COMPARABILITY

Similarities and differences:

Main Similarities

- All the compared Universities have a similar duration for the MSc (Chemistry) qualification to the University of Botswana (2 years).
- In all the compared Universities, the research project is in area of specialisation of the candidate (i.e., Analytical, Inorganic, Organic, or Physical Chemistry).
- All the compared Universities have similar credits for the dissertation/Thesis module to the University of Botswana (120).
- Both the University of Botswana and the University of Auckland, New Zealand, have 240 credits as the minimum credits for the MSc (Chemistry) degree qualification.

Main Difference(s)

The minimum credits for the MSc (Chemistry) degree qualification are 288 and 390 credits at the University of Namibia and Makerere University, respectively.

REVIEW PERIOD

Every 5 years
