	Masters					Doctorate/ PhD							
<b>RATIONALE AND PURPOSE OF THE QUALIFICATION</b>													
<p><b>RATIONALE:</b></p> <p>Botswana currently has emergency medical technicians who have limited skills and competencies, and only a few emergency care practitioners with advanced skills and competencies. However, each year there are about 480 fatalities, and 1500 road users who are seriously injured on the roads in Botswana (MVA,2016). Motor vehicle collisions rose by 7.4% from 17 341 in 2018 to 18 623 in 2019, whereas casualties rose by 3,2% from 6243 in 2018 to 6442 in 2019 (MVA, 2019). As a result, there is currently an increased burden of time critical emergencies putting strain on emergency care technicians and in hospital personnel who are at</p>

times required to leave their primary duties to manage critical patients. Therefore, there is a need to train, develop and educate emergency care practitioners with advanced life support skills and competencies such as advanced airway management, advanced cardio-respiratory therapies, neonatal and paediatric emergency management, and specialized medical transportation.

Graduates from this qualification will provide specialized advanced care which will improve patient outcomes. Emergency medical care training and education have been a priority for Botswana. According to the HRDC 2019 report, emergency medical care remains a high priority for Botswana.

### **PURPOSE:**

The purpose of this qualification is to produce graduates with specialised knowledge, skills and competence to:

- Provide advanced management of medical and trauma emergencies independently in various settings.
- Participate in promotive, preventative, curative and rehabilitative care.
- Conduct academic research within health care.
- Demonstrate competencies in various rescue skills.
- Display empathy, professionalism, and advocacy in patient care.

This qualification is intended to educate and train Emergency Care Practitioners that will excel in Emergency Medical Care and become ethical, knowledgeable, and innovative leaders in pre-hospital care.

### **MINIMUM ENTRY REQUIREMENTS (including access and inclusion)**

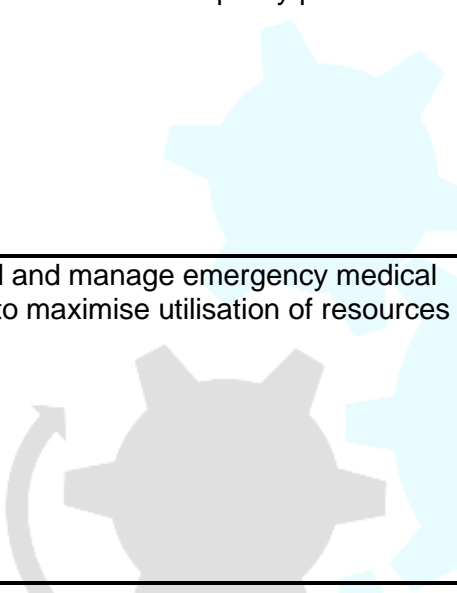

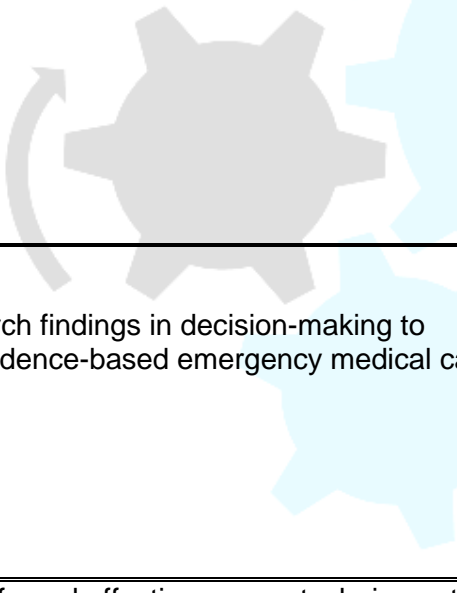

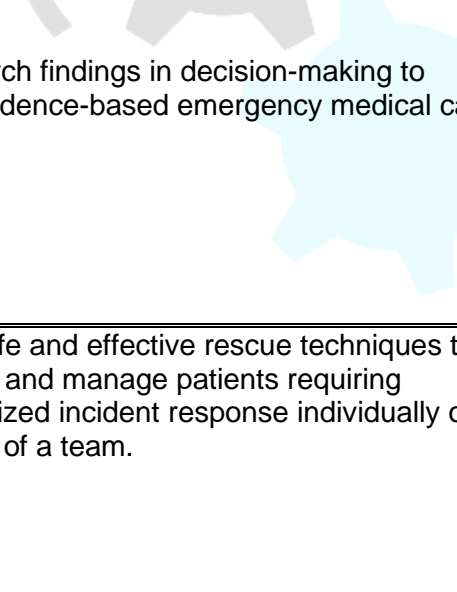

To be eligible for admission for this qualification, potential candidates must have:

- Certificate IV (NCQF level 4) or equivalent.
- Applicants who do not meet the above may be considered through Recognition of Prior Learning (RPL) and Credit Accumulation and Transfer (CAT) institutional policies in line with National RPL and CAT Policies for access.

**Rules of Combination:**

**(Please Indicate combinations for the different constituent components of the qualification)**

This qualification is worth a total of 565 credits which comprises of;

**Fundamental Credits:**

- Level 5 =24 credits.
- Level 6 =112 credits.
- Level 7 = 24 credits.

**Core Credits:**

- Level 5 = 46 credits.
- Level 6 = 64 credits.
- Level 7 = 164 credits.
- Level 8 = 123 credits.

### **ASSESSMENT ARRANGEMENTS**

#### *Professional registration and accreditation*

All assessors and moderators must be registered and accredited by relevant accreditation bodies.

Assessment Weightings will be as below:

Semester modules

50% formative assessments

50% summative assessments

Year modules

60% of formative assessments

40% summative assessments

### **MODERATION ARRANGEMENTS**

The following shall apply for both internal and external moderation.

Internal moderation requirements and external moderation shall be carried out in accordance with ETP moderation policy and BQA requirements.

Professional registration and accreditation

All assessors and moderators must be registered and accredited by any recognised institution.

### **RECOGNITION OF PRIOR LEARNING**

Applicants may submit evidence of prior learning and current competence and/or undergo appropriate forms of Recognition of Prior Learning (RPL) assessment for the award of credits towards the qualification in accordance with applicable institution RPL policies and relevant national-level policy and legislative framework.

Implementation of RPL shall also be consistent with requirements, if any, prescribed for the field or sub-field of study by relevant national, regional, or international professional bodies.

	<b>BQA NCQF QUALIFICATION TEMPLATE</b>	Document No.	DNCQF.P01.GD02
		Issue No.	01
		Effective Date	01.08.2022

### **CREDIT ACCUMULATION AND TRANSFER**

Credit accumulated shall be evaluated and transferred guided by the institutional CAT policy

### **PROGRESSION PATHWAYS (LEARNING AND EMPLOYMENT)**

#### *Horizontal Articulation*

Graduates of this qualification may consider pursuing related qualifications where exemptions and credits may apply in the health care services, education and management sectors such as but not limited to:

#### Bachelor of Science Nursing

- Bachelor of Medicine,
- Bachelor of Surgery (MBBS)
- Bachelor of Arts in Psychology
- Bachelor of Science in Healthcare management
- Bachelor of Science in Health Promotion and Education
- Bachelor of Science in Occupational Health and Safety

#### *Vertical Articulation*

Graduates may progress to higher level qualifications such as Masters' degree qualifications programs such as (but not limited to):

- Master of Science in Emergency Medical Care
- Master of Philosophy in Emergency Medicine
- Master of Philosophy in Public health
- Master of Business Administration Business Administration

### **EMPLOYMENT PATHWAYS**

*Graduates will have requisite competencies and attributes to work as (but not limited to):*

- Emergency Care Practitioner
- Ambulance base Officer
- Uniformed Services Emergency Care Practitioner
- Emergency Care educator
- Managers of remote and local clinics.

### **QUALIFICATION AWARD AND CERTIFICATION**

Minimum standards of achievement for the award of the qualification

Candidates must meet the minimum standards to be awarded the qualification. Candidates must acquire the accumulative 565 credits, successfully achieve work-integrated learning outcomes and complete a research project to be awarded this qualification.

Certification

Candidates meeting prescribed requirements will be awarded the Bachelor of Science in Emergency Medical Care qualification in accordance with standards prescribed for the award of the qualification and applicable policies, including 565 credits comprising coursework, research project, and work-based learning.

### **SUMMARY OF REGIONAL AND INTERNATIONAL COMPARABILITY**

When comparing the proposed qualifications to those offered by Monash University Australia Masinde Muliro University of Science and Technology Kenya Cape Peninsula University of Technology, and Durban University of Technology, there are several similarities and differences.

The similarities include the duration of the program, which is typically four years, and the inclusion of work-integrated learning within the training. Additionally, the credit requirements for these qualifications are similar. Subjects offered are similar i.e., modules such as organizational behaviour, entrepreneurship, health promotion and education cut across the three institutions and compare favourably with the proposed qualification. The exit outcomes are similar for all three institutions and therefore are a good comparison as the proposed qualification also has similar exit outcomes.

The course content is similar between these universities. However, there are differences in terms of the program duration, the Masinde Muliro University of Science & Technology has a longer duration which consists of three years of coursework and an additional 18 months of internship. The credits are also lower for Monash University Australia compared to others. This, therefore, means the proposed qualification compares favourably with the two institutions.

Overall, it is important to consider both the similarities and differences in the qualifications offered by various universities to make an informed decision about which qualification best suits the needs and goals of the country. This Qualification compares closely with the South African bachelor's degree in emergency medical care and has also content from the other institutions it has been compared to. Students who graduate from this qualification will be able to apply for vertical and horizontal progression in institutions offering similar outcomes and credits. Graduates from this qualification will be able to progress into a Master's degree and eventually PhD qualifications.
